Work

Dapp Development

Working on UX focused, tokenless services enabled by the ethereum blockchain.

Check out the first Dapp anonplayer.com

'17

Cryptocurrency Arbitrage

Enjoyed first mover advantage with my arbitrage algorithms, among the many brand new cryptocurrency exchanges. Followed a data-first and risk averse approach, and wrote programs to synchronize trading data and monitor opportunities.

'16

Open Source Code

Coin Aggregator : cryptocurrency arbitrage bot written in node.js

Freedom Forex : cryptocurrency facilitated USD to INR rate calculator

Other projects on github

Intro to Internet program

Ran an *'introduction to internet'* program for financially disadvantaged children. The aim was to develop a crash course that teaches English and IT as gateways to anything that students wanted to pursue

Explored the online job market for potentially skilled-but-uncertified students. I supported the program and myself this way, doing online gigs for giants like *google* and startups like *ask wonder*.

My income and consequently resources couldn't keep up with demand for this free course

'15

AMAZON.IN

Abuse Risk Investigator

analyse suspicious transactions and data for fraud and malpractices

'14

Graduation

Visvesvaraya National Institute of Technology, Nagpur

Civil Engineering
